# HAYER & BOECKER - Know how and Competence in Packaging

Bag testing equipment

Bag consulting

Bag starter kits

Full bag supply

We have handled thousands of different bags and our proven analysis equipment leads to economical packing solutions for filling your loose and bulky products. Our test equipment allows you to determine process-relevant product properties. Whenever there are product changes, changes in the machine settings or with new packaging material, the needed adjustments to the machine parameters can be determined by conducting tests.

#### Our offer to you

- The HAYER AIRFLOW TESTER® for determining the entire bag's capability to vent out air.
- The HAYER BIG GURLEY® for measuring and evaluating the air permeability of a packaging material.
- The HAYER BAG DROP TESTER® for drop testing a filled bag.

Seen from the perspective of the end-user, the bag is the producer's business card. The way in which the bag presents itself not only reflects on the quality of the product in it, but also on the company that made, filled and sold it. The quality of the package conveys the producer's image to its market, customers, competitors, and even its very own employees. A proper bag is part of excellent and profitable filling. By knowing our equipment very well, we can help optimize your process and your bags.

We consult on functionality, filling speed, application rate, sealing, cleanliness, efficiency, costs and quality.

We assure a perfect beginning. We know perfectly well that the right packaging is half the success. By knowing your products we choose the best packing system and manage the ideal packaging for you! Keep your focus on your business and the start of your process with the new equipment. From the design to the production with individual printing, we develop the perfect packaging.

We take care of everything around your bag and the complete logistics. Concentrate fully on your business. You will always receive the same quality just-in-time:

- from a single source
- with high quality paper and all individual specifications
- worldwide
